

Parrot Hands Free Car Kit Installation

Affordable High Quality Mobile Installation currently available in the San Francisco Bay Area and Sacramento.

Best Buy can also install your car kit, but you will need to buy a plug and play harness as many of the stores will not install your car kit without one. Safewireless is a primary car kit harness supplier for Best Buy across the country as well as car stereo installers and dealers in the U.S.

Please visit our pre-installation tips section and the installation picture gallery. Please call for information or email for details.

We pride ourselves on being extremely knowledgeable about Parrot Car Kits, if you have questions, we can answer them!
