

## SoundRacer V8 and V10

click here to buy-

<http://www.safewireless.com/hands-free-store/soundracer-v8-and-v10-c-50.html>

Soundracers at a discount, the lowest price on the net anywhere! We will beat any other dealer's price on the net.

Soundracer v8 and v10.

\*Please see a few vehicles below that have we have received feedback that the SoundRacer that did not work properly.

Most cars do work, however, on some cars the electrical signal is too low or high.

We have very few returns from customers whose cars were not compatible.

Imagine starting up your modern, boringly silent car and the interior is filled  
with the thrilling.....

Shift in the first gear, hit the gas pedal and the  
driving experience will really excite you!

In every phase of driving -  
accelerating, decelerating, shifting, cruising and idling &mdash;

the sound  
is so convincing that it actually fools your senses to believe that you  
are driving the real thing,

a Super Sports Car!  
And when you prefer to listen to your favorite music, just plug in  
your MP3 player and the music will sound loud and clear in your car  
stereo system.

No installation, no tuning, just plug into the  
cigarette lighter socket, select a

frequency for the car stereo  
receiver and turn up the volume. It's yours for

just a little more than  
a standard Car FM Transmitter and your car will

never be boring again.

## How It Works

SoundRacer has developed a special technology to sense and calculate the car

engine rpm and produce the sounds of a powerful Super Sports Car engine.

The sound changes as you drive and SoundRacer even increases the speed of the

engine sound so that you can drive at a normal speed and still get a very exciting

engine sound.

A built in FM transmitter transfers the sounds on a selectable frequency to the car stereo system.

It also works as a standard Car FM-transmitter for MP3 players with a line in socket that provides an input for playing music on the car stereo.

A very unique fun gadget for every car enthusiast!

Imagine a speaker mounted outside of the car underneath the chassis so the world can hear your world beater sports car sound too! Coming soon...

## SoundRacer Listed Cars

If you do see your car in the SoundRacer Listed Cars don't worry! SoundRacer can

still work perfectly well in your car, it has just not yet been reported or tested.

If you have tried SoundRacer in another car, engine version or year model, please send

us an email to [ken@safewireless.com](mailto:ken@safewireless.com) and let us know how it works. Include car model,

engine version and year.

Thank you!

On the following cars a low signal level and/or a high level of electrical noise has caused problems for SoundRacer to perform satisfactory:
